

## Jurassic Park

**Steven Spielberg** the man that made renowned movies like *Jurassic Park* (1993), *The War of the Worlds* (2005), *E.T.* (1984), and another's movies.

He was born on December 12-th 1946 in Cincinnati SUA.

One famous movie that surrounds the world and gave strong emotion when people watched it was: *Jurassic Park*. This movie is special because two reasons:

First because it seems very real, the animals (dinosaurs) are real, reality interweaves with fiction perfectly.

Second because he created by this movie a thing that most people believe that was disappeared long, long time ago. In fact the movie shows us what can happen when the animals created by men (in laboratory) escape and the life of men are in danger.

**Subject** of this movie (**Jurassic Park**) seems simple but very attractive. It passed four years from ineffective attempts to create a park populated with dinosaurs in Nublar Island. But John Hammond does not lose the time and now he testifies to Ian Malcolm that exist another island and no body knows about it. In this island dinosaurs were created for first time. In this island dinosaurs survived and grown up in workshop B in Serrano island. Now Hammond is anxious to show his creation to everybody.

Before to show to people his creation Malcolm gathered a research team to visit island and see the truth about dinosaurs. When the team arrived on island the team discovered a group lead by Hammond's nephew that have another goal but no scientific. The group members want to capture the dinosaurs and sold them to one amusement park in San Diego.

In this time a energy break happened and the team had problems with the dinosaurs. Now the movie is one struggle between men and dinosaurs. Who will escape, who will win the war? May be intelligence or the size? The dinosaurs are very clever and surprise the team few

time. In fact, escape just a few members of the team. The others are killed or eaten by dinosaurs. The movie has fun moments, when a dinosaur sneezes a boy says: "bless".

The movie finishes and the viewer can realize that everything was just one movie about old-time and disappeared animals: dinosaurs. This movie must be watched, watched, and watched...
